

How Teampay Empowers Distributed Teams

To ensure distributed teams are set up for success, companies need to put the right tools in place so employees can do their best work from anywhere. Shared corporate cards don't work for a remote workforce and employees may be hesitant to put purchases on their own cards for reimbursement later.

Teampay is the only spend management platform built for distributed employees to spend with confidence, wherever they are – while giving Finance real-time visibility and upfront controls.

Make purchases from anywhere

With Teampay, employees are empowered to make purchases no matter where they are. When a purchase request is approved, Teampay creates a unique virtual card that's limited to each request – meaning you have full control over spending.

Optimize the employee experience

Implementing a new solution often requires time and effort to coordinate training across a remote workforce. Teampay's conversational interface, accessible by web app or through Slack, seamlessly guides employees through the buying process – making onboarding a breeze and accelerating product adoption.

Increase visibility and agility

Real-time visibility is essential for Finance and approvers so they can make decisions quickly and provide strategic input at a moment's notice. Teampay gives visibility into spend as it's occurring, instead of after-the-fact, helping Finance prevent common problems like duplicate subscriptions.

Automate manual processes

Finance teams spend a lot of time coding purchases, asking for clarification, and tracking down receipts. This is even more challenging when employees are remote. With upfront coding and automated receipt upload reminders, Teampay eliminates days of manual work, freeing Finance teams to focus on strategic projects and employees to continue their work without interruption.

Drive policy without slowing employees down

As companies adjust to market changes, so does their purchasing policy. Teampay enables finance teams to rollout policy change in a single **sentence**. Companies can quickly adapt to internal or external changes, without disrupting employees.
