

Many finance professionals think that age-old problems are just part of the job.

Poor compliance with spend policy

Lack of visibility and inaccurate reporting

Hours (or days!) of tedious manual work

But they don't have to be.

Most purchasing software is designed for accountants. But in today's world employees do most of the purchasing, so it's no wonder those age-old problems persist even after you upgrade your software.

Teampay is the only solution that's designed with your entire company in mind, eliminating those problems for good. Teampay makes it easy for employees to follow the correct purchasing process, driving compliance through the roof and creating the visibility your team needs without the slow, painful purchasing processes they don't.

“

As the providers of capital and resources, we wanted to provide a fast spending process to the organization while creating accountability and treating people as adults so they can make decisions.

– John Chard,  
VP of Finance at Consensys

With Teampay you'll have...

0

unauthorized purchases

days off your month-end close

approval in  
20 minutes  
or less

0

expense reports  
to review and  
correct later

100% of spend on  
a single platform

## For every purchase, no matter how it's paid, employees just go to Teampay.

And you'll capture all spend in one place  
without even having to try.

Virtual Cards

Physical Cards

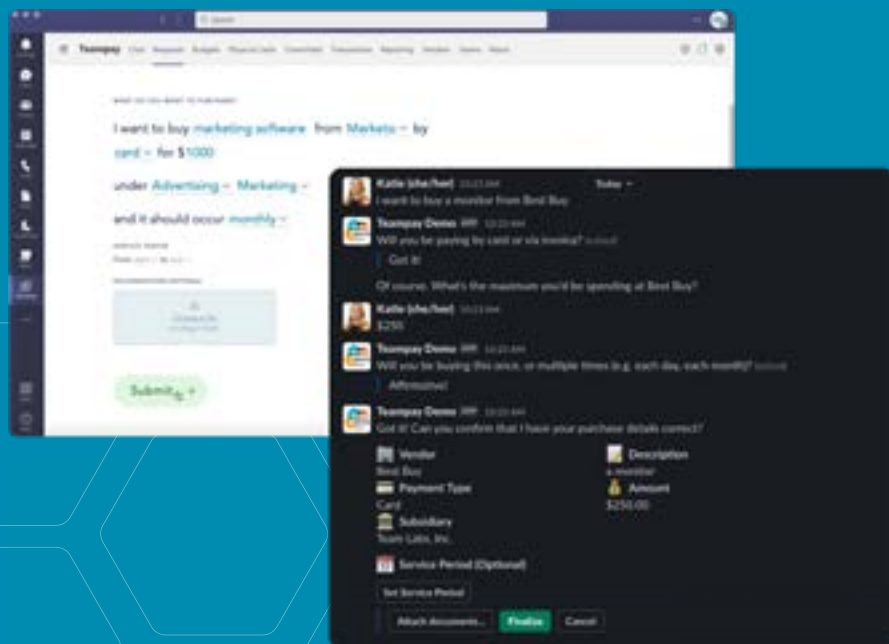

Accounts Payable

Reimbursements

## Making a purchase is as easy as having a conversation.

The easy-to-use interface lives  
right in your chat tools and  
guides employees through each  
purchase from start to finish.  
No training sessions or  
handholding required.
